

What is API?

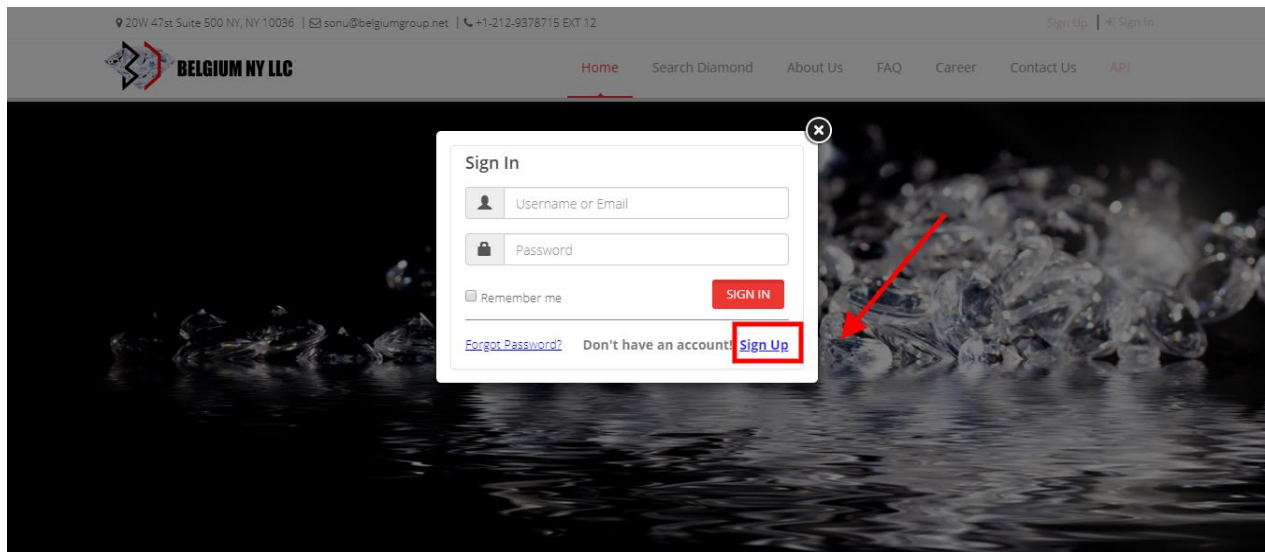

The acronym "API" stands for "Application Programming Interface". An API is a defined way for a program to accomplish a task, usually by retrieving or modifying data. In This version of the Belgium NY API, we provide an API method for some of the features either you can get our all inventory information or search through diamond stock Id. Programmers use our API to show our inventory into his own platform it can be websites application, mobile application and desktop application which easily interact with Belgium NY inventory system because we provide platform independent API.
